

Favorite Electronic Devices Survey Report

Overview

This survey was conducted to collect information about people's favorite electronic devices, usage habits, and recommendations. The data was collected through a Google Form questionnaire.

Dataset Summary

Total Responses: 125

Total Columns: 8

Data Collection Method: Google Forms Survey

Key Findings

Gender Distribution: Male 79 (63.2%), Female 46 (36.8%).

Most Popular Devices: Smartphone (53), Laptop (26), Smartphone and Laptop (11), Smart TV (6), Tablet (6).

Daily Usage: Most respondents use their devices 1–3 hours per day.

Main Purpose: Education was the most common reason for device use.

Recommendation: 108 respondents (86.4%) would recommend their device.

Data Quality Issues

Duplicate names, inconsistent categories, possible age validation issues, and formatting inconsistencies may require preprocessing.

Machine Learning Perspective

Features: Age, Sex, Favorite Device, Daily Usage, Main Purpose.

Label: Recommend Device (Yes/No).

Learning Type: Supervised Learning (Classification).

Conclusion

The survey collected 125 responses and showed that smartphones are the most popular devices. Most participants use devices for educational purposes and would recommend them to others. The dataset is suitable for machine learning classification after preprocessing.
